

Orb International Enhanced Income - YIELDS

Update as of: 29th October 2004

Issue Date: 30th July 2004

Maturity Date: 22th July 2010

YIELDS offer the potential for quarterly income and capital appreciation through exposure to a selection of high yielding large cap equities, selected from the Dow Jones Global Titans 50SM (DJGT) Index. YIELDS are linked to a Dynamic Portfolio, which provides exposure to a combination of the proprietary Income Plus Trading Strategy and the Bond Portfolio (BP), a synthetic zero coupon bond portfolio. YIELDS are 100% capital protected at maturity.

LHS/RHS means Left/Right hand side axis

Total Return since Issue Date (ii)

Past performance is not a reliable guide to future results.

Total Return and Distribution paid since Issue Date (ii)

(i) Bid Price is the ASX market bid price of YIELDS (ASX code: YLDSO1) as at the respective month end. This price reflects the highest market bid in the security as at the close of trading. In the event of no higher bids this price may represent Citigroup's market bid price for YIELDS. On the Issue Date the initial value of YIELDS was AUD 9.64 per unit. (ii) Price return and total return since Issue Date are calculated as a % change in price versus the YIELDS Value at the beginning of the reference period net of any upfront fee and other ongoing fees. Total return figures include distribution paid and assume no reinvestment over life. (iii) YIELDS Distribution % is calculated as the total distribution declared per unit during the period as a % of the YIELDS ASX bid price at the beginning of the period. % figures are not annualised. (iv) This is the AUD amount collected to date per YIELDS unit for the next quarterly distribution. This amount is an estimate as of month end, based on available information at the time and assumes the current allocation remaining constant. It is for indication only and may be subject to change. (v) Strategy and BP monthly change are estimates and are calculated using beginning and end of month Citigroup bid prices and allocations to the Strategy. (vi) The Dynamic Portfolio Reference level is the indicative value of the Net Portfolio Unit NAV as at the respective month end and has been derived from proprietary models that take into consideration estimates about relevant present and future market conditions as well as the size and liquidity of the position and any related actual or potential hedging transactions. It is for indicative purposes only and subject change. (vii) If the Gap measure rises above 25%, an "up-leverage" event will occur; a fall of the Gap measure below 15% would lead to a "de-leverage" event. MoM means month on month change. Figures are calculated using month end data. Charts are based on month end data. Source: Bloomberg (DJGT Index and exchange rates) and Citigroup Global Markets Limited.

AUD Income Plus Strategy Performance

Update as of: 29th October 2004

The Income Plus Strategy is based on a proprietary trading model that seeks to offer income and the potential for capital appreciation through exposure to global equity markets. Each year, the Strategy selects a portfolio of 30 high yielding stocks from the Dow Jones Global Titans 50SM (DJGT) Index. Further yield enhancement is achieved by writing quarterly covered call options on each of the stocks within the Strategy. The call option overwriting is intended to help the Strategy outperform a direct investment in the underlying portfolio of stocks in all but strong bull market scenarios.

Performance Table⁽¹⁾

Performance Table	MoM	Year to date	Since Jul 03
AUD Strategy Price Return	-4.92%	-5.78%	-6.47%
AUD Strategy Total Return	-2.87%	3.71%	5.88%
AUD Strategy Yield	2.04%	9.49%	12.35%
AUD DJGT Price Return	-1.00%	0.48%	0.23%

In October, each AUD10 unit of YIELDS distributed income of AUD0.2331. As a consequence of the distribution, the Strategy declined in value leading to a negative month-on-month price performance of -4.92%. On a total return basis the Strategy value declined by only -2.87%. Equivalent price return for the DJGT index was -1.00% month on month. The Strategy is underweight both technology and consumer non-cyclical sectors in comparison to DJGT and thus benefited less from their positive performance.

Decline in the healthcare sector had a negative impact on the Strategy, which however was mostly offset by healthy performance of technology and consumer non-cyclical sectors. USD, EUR and GBP holdings weakened against the AUD, which had a considerably negative effect on the Strategy.

Volatilities are at historically low levels thus squeezing the premiums received from the new call overwriting program. Hardly any companies in the holding paid dividends this month so little new income was generated at the Strategy level.

Top Ten Holdings⁽⁴⁾

Company	Sector	Currency	Country
Altria Group Inc.	Consumer Noncyclical	USD	US
Barclays	Financial	GBP	UK
DaimlerChrysler AG	Consumer Cyclical	EUR	Germany
ENI SpA	Energy	EUR	Italy
GlaxoSmithKline	Healthcare	GBP	UK
HBOS	Financial	GBP	UK
HSBC Holdings Plc	Financial	GBP	UK
ING Groep NV	Financial	EUR	NL
JP Morgan	Financial	USD	US
SBC Communications Inc.	Telecommunications	USD	US

(1) Return figures are calculated as a % change over the period, include income distributed by the Strategy and assume no reinvestment over life. (N.B. The % coupon paid on the Note is not the same as the % income distributed by the Strategy as the coupon is among other things a function of the allocation to the Strategy). Yield is based on value of Strategy as of beginning of period. (2) Percentage change of each currency holdings within Strategy versus AUD over the past month, using currency weightings as of end of month. (3) Breakdown as of beginning of month using live weights and prevailing exchange rates and showing the exposure of the Strategy holding to the currencies listed. (4) Top ten holdings shown alphabetically as of last rebalancing (5) Price performance showing sector returns as measured in the stocks' respective local currencies over the past month, using live weights as of beginning of month. (6) Breakdown as of beginning of month using live weights reflecting the relative value of each stock/sector as of that time in percentage of the value of the total Strategy holding.
