Total Return and Coupons paid since Issue Date ⁽ⁱⁱ⁾

(i) Bid Price is the ASX market bid price of YIELDS4 (ASX code: YLDSO4) as at the respective month end. This price reflects the highest market bid in the security as at the close of trading. In the event of no higher bids this price may represent Citigroup's market bid price for YIELDS4. On the Issue Date the initial value of YIELDS4 was AUD 9.67 per unit. (ii) Price return and total return since Issue Date are calculated as a % change in price versus the YIELDS4 Value at the beginning of the reference period net of any upfront fee and other ongoing fees. Total return figures include distribution paid and assume no reinvestment over life. (iii) YIELDS4 Distribution % is calculated as the total distribution declared per unit during the period as a % of the YIELDS4 ASX bid price at the beginning of the period. % figures are not annualised. (iv) This is the AUD amount collected to date per YIELDS4 unit for the next quarterly distribution. This amount is an estimate as of month end, based on available information at the time and assumes the current allocation remaining constant. It is for indication only and may be subject to change. (v) Strategy and BP monthly change are estimates and are calculated using beginning and end of month Net Portfolio Unit NAV's and allocations to the Strategy. (vi) The Dynamic Portfolio Reference level is the indicative value of the Net Portfolio Unit NAV as at the respective month end and has been derived from proprietary models that take into consideration estimates about relevant present and future market conditions as well as the size and liquidity of the position and any related actual or potential hedging transactions. It is for indicative purposes only and subject to change. (vii) If the Gap measure rises above 25% (of the YIELDS4 Value), an "up-leverage" event will occur; a fall of the Gap measure below 15% would lead to a "de-leverage" event. MoM means month on month change.

AUD Asian Income Plus Strategy Performance

Update as of: 31 December 2007

Protection First

The Asian Income Plus Strategy III is based on a proprietary trading model that seeks to offer income and the potential for capital appreciation through exposure to 30 of Asia's largest companies by Market capitalisation. Each year, the Strategy selects a portfolio of 30 high yielding stocks from the MSCI* AC Asia Index. Further yield enhancement is achieved by writing quarterly covered call options on each of the stocks within the Strategy.

MoM Sector Returns within Strategy ⁽⁵⁾

Sector Breakdown ⁽⁶⁾

(1) Return figures are calculated as a % change over the period, include income distributed by Strategy and assume no reinvestment over life. (N.B. The % coupon paid on a Note linked to Strategy is not the same as the % income distributed by Strategy, as a Note's coupon is among other things a function of allocation to Strategy). Yield is based on value of Strategy as of beginning of period. (2) Percentage change of each currency holdings within Strategy versus AUD over the past month, using currency weightings as of end of month. (3) Breakdown as of beginning of month using live weights and prevailing exchange rates and showing the exposure of Strategy holdings to the currencies listed. (4) Top two holdings from each country as of last rebalancing. (5) Price performance showing sector returns as measured in the stocks' respective local currencies over the past month, using live weights as of beginning of month. (6) Breakdown as of beginning of month using live weights reflecting the relative value of each stock/sector as of that time in percentage of the value of the total Strategy holdings.
